

# Turbo Charged

RG Spaces & friends @ The Turbine House

A project to:

- encourage use, understanding and enjoyment of the Turbine House and its environs
- evaluate the usage and its impact to inform suggestions on the site's future use

Do this by:

- liaising with other organisations/artists/craftspeople etc. to further enable them to use, and where appropriate interpret or enhance, the site
- helping draw up and support a series of exhibitions and activities by
  - creating signage
  - encouraging artwork and other interpretation in the site's environs
  - other advertising
  - running joint activities

While the Turbine House is a facility provided for all the local community, this project will particularly bear in mind:

- RG Spaces' and Reading Museum's aim of encouraging interest in Reading's heritage
- the nearby communities in Newtown and Kennet Walk
- the build up to The Reading Resource Centre/Museum proposed exhibition in 2018

Project dates: December 2016 - October 2017
